

PRODUCT NAME	Teclay Clean (conditioning film)		
GENERAL INFORMATION	After cleaning the press plates, an optimal press plate condition can be restored by pressing with the conditioning film. For the correct application of the conditioning films, we recommend following the corresponding instructions.		
TECHNICAL SPECIFICATIONS	Film weight: about 180 g/m ²	sheet width: up to 2.800 mm	sheet length: up to max. 6.000 mm
INSTRUCTIONS FOR USE AND PROCESSING	For conditioning new or freshly cleaned press plates, used for pressing melamine resin, urea resin or phenolic resin films.		
LIGHT FASTNESS	negligible		
STORAGE CONDITIONS AND WARRANTY	Depending on production process Teclay Clean (conditioning film) can be stored for up to 12 months in the original packaging at max. 25°C and at a max. relative humidity of 50%.		
FORM OF DELIVERY AND PACKAGING	Sold as sheet and roll stock packed securely for transportation on pallets in appropriate wooden crates. Wrapped in protective film to prevent the ingress of steam and moisture.		
ENVIRONMENTAL COMPATIBILITY	We recommend monitoring emissions (formaldehyde) during processing. The respective measurements should be repeated at regular intervals. Use of an adequate extraction system will ensure adherence to limit values. Teclay Clean (conditioning film) will comply with environmental regulations if the recommended processing steps are observed. Disposal: We recommend incinerating this product; moreover, relevant country-specific disposal regulations are to be observed.
